TOPAZ DIFFERENTIAL

PRODUCT INFO

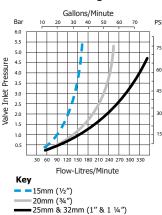

Topaz Differential valves are ideal for use in water tanks which are filled by a pressure system controlled water pump. The valve gives a level difference which is adjustable from 50mm up to 2.5m to minimise starting and stopping of the pumping system.

Applications

Maintaining Water Levels in:

- Water Storage Tanks
- Water Cisterns
- Irrigation Applications

Flow Graph

Principle of Operation

- The valve mounts at the top of the tank.
 It fits easily through a thin walled tank or screws into a threaded tank inlet.
- As the tank empties the weighted float travels down the cord until it hits the bottom stop. The valve then opens immediately to give a full flow.
- The valve now runs constantly and the weighted float rises until it hits the upper float stop. This lifts the arm and the valve shuts down.
- Observe the pressure that your pump runs at while the tank is filling. Set the pressure switch to turn the pump off at a pressure at least one bar above the running pressure.

Pressure Range

1 Bar – 10 Bar (15psi-150 psi)

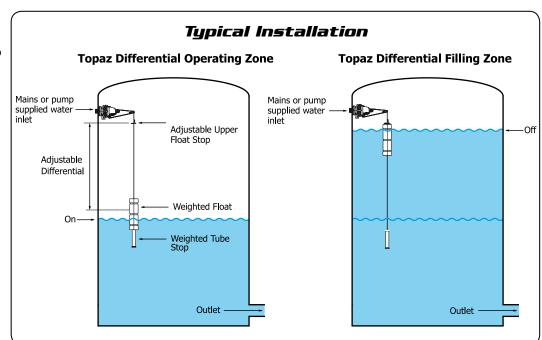

Features

- High flow
- Start and stop levels can be easily adjusted to give water level differentials from 50mm to 2.5 m
- Keeps pump operation to a mininum.
- Detach[™] Valve Seal Access System for quick access to valve seal (Patented)
- Ideal for all makes and models of tanks.

Available Inlet Sizes

15mm (1/2") 20mm (3/4") 25mm (1") 32mm (1 ¼")

All supplied in Detach long tail thread with back nut

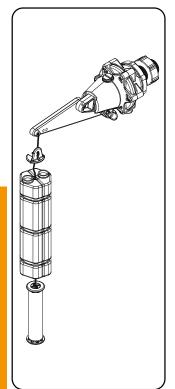

TOPAZ DIFFERENTIAL

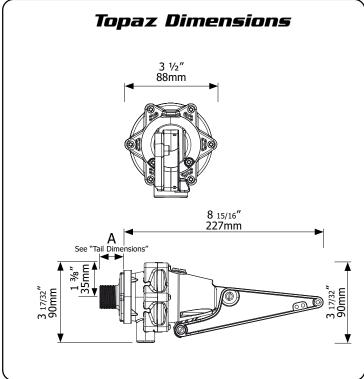

DIMENSIONS & MATERIALS

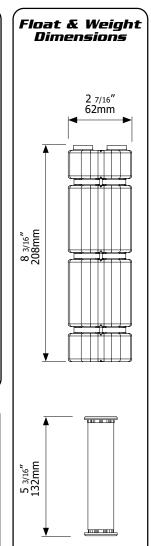

Differential

Part	Material	Part	Material
Valve Body	Glass Filled Nylon	O'Rings	Nitrile
Yellow & White Internal Parts	Acetal	Float	HDPE
Filter	PP/Nylon	Float Cord	Polyester
Diaphragm	EPDM	Actuator / Arms & Caps	AB5
Seal .	TPU		
Springs, Bolts, Nuts, Pin, Screws	304 Stainless Steel		

Maximum Operating Temperature

60°C, 140°F

NB: High Temperature models on request.
